Cloud Infrastructure: AWS, Microsoft Azure, Google Cloud Platform

Project Management & Communication Tools: Trello, Basecamp, GitHub, SharePoint, Slack, Teamwork

Graphic Design: Adobe PhotoShop, CorelDraw, Adobe Illustrator, Figma

Customised Email Hosts: Godaddy, Hostgator, Bluehost, Ionos by IandI, Namecheap, A2 Hosting, GSuite, domain.Google

Payment Integrations: Stripe, PayPal, InfusionSoft

Email Marketing: Mailchimp, Drip, Aweber, Constant Contact, Get Response, SendinBlue, Sales Pype Pro, Active Campaign and more

CAREER EXPERIENCE & MILESTONES

Beyond Digital Mauritius – Mauritius

February 2020 – Present

Sister Company To 'My Funnel Team'

Full Stack Developer (Fully Remote)

Overview: Leveraged extensive web development expertise to build websites, sales pages, and landing pages from mockup designs using WordPress, Click Funnel, HTML, CSS, and Javascript – utilising diverse plugins to introduce desired web page features, including Thrive Architect Builder, Elementor Builder, Optimise-press. Integrate web payment and email marketing using API, HTML, Javascript and Google and Facebook Ads. Present completed websites to clients using video conferencing tools and provide technical information and instructions using pre-recorded end-user and administrator tutorial videos.

Major Contributions:

- Exemplified commitment to client satisfaction through on-time completion of development projects in line with pre-agreed timelines and specifications.
- Demonstrated versatility and a willingness to go above and beyond by offering graphics design and creation of digital assets based on project requirements.

CAREER EXPERIENCE & MILESTONES *(continued)*

Funnel Ignition – Chicago, Illinois

February 2018 – 2021

Frontend Developer | Web Designer (Part Time)

Overview: Charged with overseeing the re-brand of clients' online presence through the design of logos, profile pictures, and banners for multiple social media platforms. Designed website mockups based on client brand profiles, colour codes, and logos. Integrated domains to servers using DNS and NameServers between multiple registrars. Prepared presentations for client education before website handover.

Major Contributions:

- Maintained website uptime through swift troubleshooting of all errors and skilled transfer of websites across multiple servers with zero downtime.
- Strategized and executed multiple technical integrations, including integration of WordPress and Clickfunnel, and full complete installation of WordPress websites through Softaculous, Installatron, and FTP.

My Funnel Team – Delaware

February 2017 – 2020

Frontend Developer | Funnel Hacker | Email Marketing Expert (Remote)

Overview: Coordinated initial client meetings to define project roadmap and assess requirements. Utilised insights from client interactions to delegate tasks across project teams and plan resources across the lifecycle of the project. Led team in building websites, sales pages, landing pages, and product pages from mockup designs. Completed web page security setups across multiple registrars, including Godaddy, Hostgator, Bluehost, Namecheap, A2 Hosting, Liquid Web, and domain.google. Set up ecommerce and product pages, including email and payment integration. Kept clients abreast of project status through regular updates and communications.

EDUCATION

Higher Diploma in Software Engineering

National Institute of Information Technology

PROFESSIONAL CERTIFICATION

AWS Cloud Essentials Certification – Amazon Web Services

Write Up

I am currently open to work, and I'll like to express my keen interest in the Full Stack, Frontend, or Developer Role. With a strong frontend background, backend experience, proficiency in AWS, and recent accomplishments in web app development using Node.js, Lambda functions, and OpenAI, I am confident in delivering exceptional results for your team.

Having spent 6 years in frontend development, I've mastered modern web technologies like HTML, CSS, JavaScript, and frameworks like React and Angular. My focus on intuitive user experiences and high-quality designs ensures visually appealing and responsive interfaces.

On the backend, with 3 years of experience in Node.js and Python, I excel at developing RESTful APIs, integrating databases, and handling server-side logic. My expertise enables me to build robust web applications that meet users' and clients' needs.

Moreover, my strong grasp of cloud computing is evident through my extensive work with AWS, deploying applications on services like Amazon EC2, S3, Lambda, and API Gateway. I design secure, scalable, and reliable cloud-based solutions.

I'm particularly proud of this project you're currently using to find out about me. It's a customized AI chatbot. Developed with React.js(Typescript) and Node.js(Express Backend), I used Git for version control and Git Runner to deploy the chatbot to an EC2 instance. I integrated Route 53, AWS Load Balancer, and AWS SSL Certificate for seamless domain integration.
